

Millington-cum-Givendale Parish Council

IT Policy (2026)

This IT Policy was adopted at an Ordinary Meeting of Millington-cum-Givendale Parish Council on Tuesday 3rd March 2026 by a resolution recorded under Minute Reference 2025.220(c)

1. Introduction

Millington-cum-Givendale Parish Council henceforth known as “The Authority” recognises the importance of effective and secure information technology (IT) and e-mail usage in supporting its business, operations, and communications.

This policy outlines the guidelines and responsibilities for the appropriate use of IT resources and e-mail by council members, employees, volunteers and contractors.

2. Scope

This policy applies to all individuals who use IT resources, including computers, networks, software, devices, data, and e-mail accounts. The Authority endeavours to provide digital devices but acknowledges that some small authority staff and members may be using their own personal devices. Everyone must adhere to this policy to maintain digital security.

3. Training and awareness

The Authority will source regular training and resources to educate users about IT security best practices, privacy concerns, and technology updates. You should engage in regular training on e-mail security and best practices, including but not limited to:

- the Parish Council Domain Helper Service’s virtual cybersecurity workshops for councils
- The National Cyber Security Centre Cyber Security training for small organisations and free Cyber Action Toolkit.

4. Acceptable use of council-provided IT resources and e-mail

When using IT resources for the council's purposes, you must adhere to ethical standards, and respect copyright and intellectual property rights.

Where possible, authorised devices, software, and applications will be provided by The Authority for work-related tasks.

You must not install unauthorised software without checking with the Clerk, and you must not use equipment or e-mail to access or forward inappropriate or offensive content.

5. What you must do if you use your own personal devices

The Authority will endeavour to provide individuals with devices to use for council business. If you are using your own device you must make sure you are:

- using strong passwords for all your accounts (preferably using a password manager)
- downloading the latest operating system security updates
- using anti-virus software

6. Network and internet usage

You must be careful about which Wi-Fi networks you join. Public Wi-Fi networks in coffee shops or on trains can be targeted by hackers. Always make sure you are using a trusted internet connection, which is password-protected, when carrying out official business.

7. Password and account security

You are responsible for maintaining the security of your accounts and passwords. Use the National Cyber Security Centre's [advice for choosing a strong password](#). For business continuity, login details and passwords need to be stored securely so they can be accessed by trusted individuals in an emergency.

8. E-mail communication

The Authority will endeavour to provide you with an official e-mail account for organisation-related communication only. If you are currently using a personal e-mail account, you should aim to move over to an official email account as soon as practically possible. You must make sure that emails are professional and respectful in tone. You must always check you are sending any confidential or sensitive information to the correct recipients.

Always be cautious when downloading attachments and opening links to avoid phishing and malware. Before opening any attachments or clicking on links, verify the source by looking at the e-mail address it has come from carefully. Do not download and open anything if you are unsure who has sent it.

9. E-mail access

The Authority reserves the right to check e-mail communications to ensure compliance with this policy and relevant laws. Monitoring will be conducted in accordance with the Data Protection Act and GDPR. Clerks may need to access e-mails so that they respond to FOI or Subject-Access Requests. If you are using a personal email account for council business, this is still subject to data protection laws and FOI requests.

10. Data management, data retention and security

All sensitive and confidential data should be stored and transmitted securely. You must regularly backup any important data to prevent data loss and follow your organisation's data retention policy.

You should retain and archive e-mails in compliance with your data retention policy. Regularly review and delete unnecessary e-mails to maintain an organised inbox.

11. Reporting security incidents

All suspected security breaches, including e-mail breaches or incidents should be reported immediately to the Clerk.

12. Compliance and consequences

Breaches of this IT Policy may result in the suspension of IT privileges.

13. Policy review

This policy will be reviewed annually to ensure its relevance and effectiveness. Updates may be made to address emerging technology trends and security measures.

14. Contacts

For IT-related enquiries or assistance, users can contact the Clerk.

All staff and Members are responsible for the safety and security of IT and e-mail systems.

Date for next review: **March 2027**.
